## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kano et al (US 6,242,719) in view of Koontz (US 5,877,473).

Kano et al discloses all the structure claimed including a disk shaped ceramic substrate with a heat-generating pattern having a combination of a spiral pattern and a bending pattern disposed on the surface of the ceramic substrate which is made of nitride ceramics and having 200 mm or more diameter. However, Kano et al does not show a bending portion having the claimed curvature radius within the range of 0.1 mm to 20 mm.

Koontz shows a heating pattern having a bending portion whose curvature radius is within the claimed range. Koontz teaches that such curvature reduces cold and hot spots along the heating element.

In view of Koontz, it would have been obvious to one of ordinary skill in the art to adapt Kano et al with the claimed curvature bending to eliminate hot and cold spots and thus provide an uniform heating across its heating surface.

With respect to claims 3 and 6, it would have been obvious to one of ordinary skill in the art to adapt Kano with the heat-generating pattern having the width within the claimed range

since such width of the heating element depends upon the desired heating resistance or power capacity one may variably desires to achieve.

***Response to Arguments***

3. Applicant's arguments with respect to claims 1-8 have been considered but are moot in view of the new ground(s) of rejection.

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a).

Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
